OBSIII Cold End Coating Twin-Axis Spray Bridge with Integrated Siemens System

*A system that combines the **benefits of the latest PLC and touchscreen technology** with the **precision of automatic, digital ratio controlled dosing.***

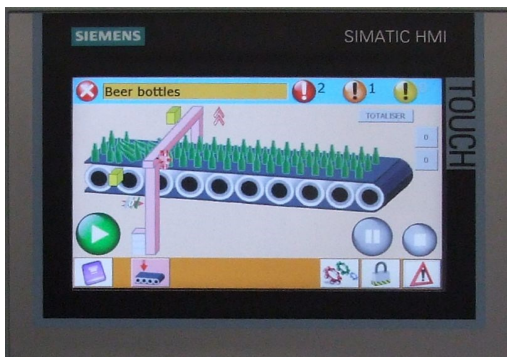

OBSIII Cold End Coating provides precision operation with set up flexibility, data retrieval and status alarm system. The benefits of this include:

- Automatic below finish spraying in two directions avoids internal container contamination.
- Constant Ware (row) Monitoring tracks the number of rows sprayed and provides job history on screen.
- Easy to use Siemens Touchscreen system.
- Bad stacking/unsprayed rows are alarmed.
- Precision Drive system provides positional accuracy with low power consumption.
- System performance history available on screen.
- Programmable in various languages.

Control Panel Interior

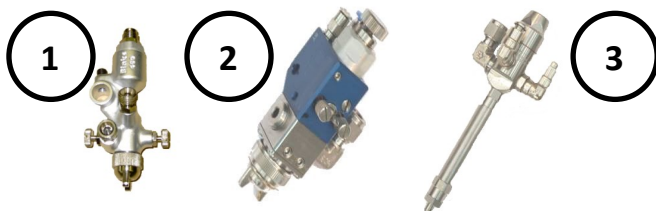

All interconnecting cables included with the system

The new Siemens touchscreen interface is clear and easy to use

Close-up of the Spray Bridge
